Department of Psychiatry and Behavioral Sciences
Emory University School of Medicine
Atlanta, GA

Meeta Singh, MD

Sleep Disorders Clinic
Henry Ford Hospital
Detroit, MI

The Clinical Review Board is a standing panel of physicians and credentialed experts who actively collaborate with CME's Medical Resources Group and the faculty of individual activities to ensure the highest level of medical accuracy and clinical relevance. The Board's semipermanent term of service provides continuity of strategic vision and scientific review to the CME educational enterprise. The CME Clinical Review Board is involved in the development and review of literature updates, disease state overviews, clinician interviews, educational needs assessments, online activities, and patient case studies. The collaborative efforts of the Clinical Review Board and the CME Outfitters Medical Resources Group result in the creation of highly relevant, evidence-based, best-in-class educational content.

CME recently launched neuroscienceCME.com to fill an online resource gap identified by clinicians practicing in disciplines related to brain function. The site's primary mission is to be the healthcare professional's central portal for accessing, debating, synthesizing, and implementing the latest findings and best practices in the neurosciences. Resources on the site encourage healthcare providers to **explore** the latest evidence, **connect** with their peers, **apply** education in practice and in virtual case studies, and through these efforts **advance** the field and improve patient outcomes.

CME Outfitters develops and distributes live, recorded, print, and web-based educational activities to thousands of clinicians each year and offers expert accreditation services for non-accredited organizations. For a complete catalog of certified activities, please visit www.cmeoutfitters.com, www.neuroscienceCME.com, or call 877.CME.PROS (877.263.7767).
